LO Brace

- ☑ Work and activity belt
- ☑ Memory foam pad
- ☑ Pulley system to apply uniform force
- ☑ Supports lumbar vertebrae (L1–L5)
 - Lumbar muscle strain ■ Herniated Disc
 - Spinal stenosis ■ Effective pain relief

LSO Brace

- ☑ Pulley system to apply uniform force
- ☑ Breathable, perforated material
- ☑ Modular, step-up design
- ☑ Anatomical foam support pad
 - Intervertebral disc herniation
 - Pre & Post–Surgery Pain ■ Spinal Stenosis
 - Intervertebral disc herniation ■ Chronic Back Pain

TLSO Brace

- ☑ height adjustable mechanism
- ☑ Back Support Jacket Relieves
- ☑ Modular Design
- ☑ Lightweight breathable mesh
 - Kyphosis
 - Mild Scoliosis – Lordosis ■ Chronic Back Pain
 - Intervertebral disc herniation
 - Pre & Post–Surgery Pain ■ Postural Alignment

TLSO PLUS

- ☑ Rigid Anterior and Posterior panels
- ☑ Quick-release shoulder buckles
- ☑ Pulley system to apply uniform force
- ☑ Restrict forward flexion and trunk rotation

- Spinal Compression Fracture
- Pre & Post-Surgery Pain
- Spinal Stenosis

Spinomed

- ☑ Cold-formable aluminum back splint
- ☑ Ergonomically shaped shoulder straps
- ☑ Breathable, perforated material
- ☑ Biofeedback posture trainer

- Reduces back pain intensity
- Pain of disability
- Improves kyphosis / posture
- Enhances trunk strength & stability

Posture Corrector

- ☑ Soft and cushiony back pad
- ☑ Simple and stylish design with neat lines
- ☑ Lightweight elastic design
- ☑ Cross-strap compression

- Rounded shoulders
- Kyphosis/humpback correction
- Dorso-lumbar strains, sprains, pain

Malleo Foot Brace

- ☑ Cross-cable support system
- ☑ ALuminum Splint
- ☑ Anatomical design
- ☑ Easy fastening
- Ankle immobilisation
- Achilles tendon injuries
- Moderate to severe ankle sprain
- Sport activities resumption

Foot Drop Brace

- ☑ Quick-fit system
- ☑ Durable material
- ☑ Easy usage
- ☑ Fully adjustable
- Limited lower extremity movement and function leading to difficulty raising the foot.
- Ankle/foot weakness.

Foot Drop Plus Brace

- ☑ Double Quick-fit system
- ☑ Breathable polymer & foam
- ☑ Semi-rigid stays
- ☑ Fully adjustable
- Provides upward foot lift and lateral stability without bulk
- Compatible with regular footwear for everyday mobility

Elbow Tennis Brace

- Quick Fit Mechanism
- Adjustable
- Ergonomic
- Lightweight
- Lateral Epicondylitis (Tennis Elbow)
- Golfer's elbow (Medial epicondylitis)
- Tendonitis or Tendinosis
- Repetitive Strain Injuries

Bionic Wrist Brace

- Quick Fit Mechanism
- ALuminum Splint
- Ergonomic
- Lightweight
- Arthritis
- Carpal tunnel Syndrome
- Injuries
- Tendinitis
- Wrist Pain
- Sprain

Wrist – Thumb Brace

- Quick Fit Mechanism
- 2 Aluminium Splints
- Thumb Protection
- Ergonomic Design
- Arthritis
- Carpal tunnel Syndrome
- Thumb Pain
- Injuries
- Tendinitis
- Wrist Pain
- Sprains

POST OP Elbow Orthosis

- ✓ ROM hinge
- ✓ Easy-to-use design
- ✓ Optimal fit & stability
- ✓ Lightweight
- Elbow reconstruction
- Ligament and tendon repairs
- Stabilization of fractures
- Surgical repair of a fracture

POST OP Knee Brace

- ✓ Adjustable hinge (ROM control)
- ✓ Rigid/semi-rigid frame
- ✓ Telescopic/length adjustment
- ✓ Lightweight
- To aid in the immobilization and protected range of motion associated with ACL, PCL, LCL, and MCL surgeries, as well as meniscal repairs.

Rehabilitation Knee Brace

- ✓ ROM-adjustable hinges
- ✓ Adjustable Straps
- ✓ Rigid/semirigid frame
- ✓ Comfort padding
- Controls knee flexion/extension during healing
- Protects ligaments and alignment

Rebound Dual Knee Brace

- ☑ Lightweight
- ☑ Height adjustable
- ☑ Adjustable design to ensure a perfect fit
- ☑ Polycentric Hinge
- Osteoporosis
- Supports ACL, MCL, LCL, PCL
- Ligament instabilities with osteoarthritis
- Protection of the knee structure after surgery

Immoblizer Knee Brace

- ☑ Immobilisation in extended (0°) position
- ☑ Open wrap design for easy don and doff
- ☑ Comfortable
- Protect.Knee immobilizer universal is a knee brace for immobilisation.

Patella Brace

- ☑ Quick fit mechanism
- ☑ Anatomical Designe
- ☑ Lightweight
- ☑ Easy to use
- Jumper's Knee (Patellar Tendonitis)
- Proprioception of the Knee
- Patellar Syndromes & Tendon disease
- Osgood Schlatter disease (Growing Pains)

4 Spring Knee Support

- ☑ Adjustable Straps
- ☑ High quality materials
- ☑ Four spiral spring
- ☑ Lightweight
 - Patellar instability
 - Knee sprain and strain
 - Enhances medial and lateral stability
 - Mild injuries of ACL, PCL, LCL, and MCL

Neoprene Knee Support

- ☑ Lightweight
- ☑ Adjustable Straps
- ☑ Ergonomic Design
- ☑ High quality materials
 - Patellar instability
 - Mild knee sprain and strain
 - Mild ligament or tendon injury
 - Protection and support of the knee during daily activities

Unloader Knee Brace

- ☑ Height adjustable
- ☑ Three-point unloading design
- ☑ Polycentric Hinge
- ☑ Fast Release Buckles
 - Varus/valgus deformity
 - Enhances medial/lateral stability
 - Better wear compliance
 - Shifts pressure away from arthritic compartment

Swedish Knee Brace (Hyperextension Control)

- ☑ Aluminum alloy frame
- ☑ Equipped with knee joints for smoother motion and enhanced comfort
- ☑ Adjustable height
- Designed to control knee hyperextension
